

PREFABRICATED BUILDINGS

Prefabricated buildings from Lauchhammer - quality for more than 30 years

Our product line of prefabricated buildings represents an outstanding core competence of BFL. These buildings are versatile and have been specially developed for various applications, including rail switch heating stations, switching and transformer stations, telecommunications stations, pumping stations, gas pressure regulating stations or railroad crossing houses.

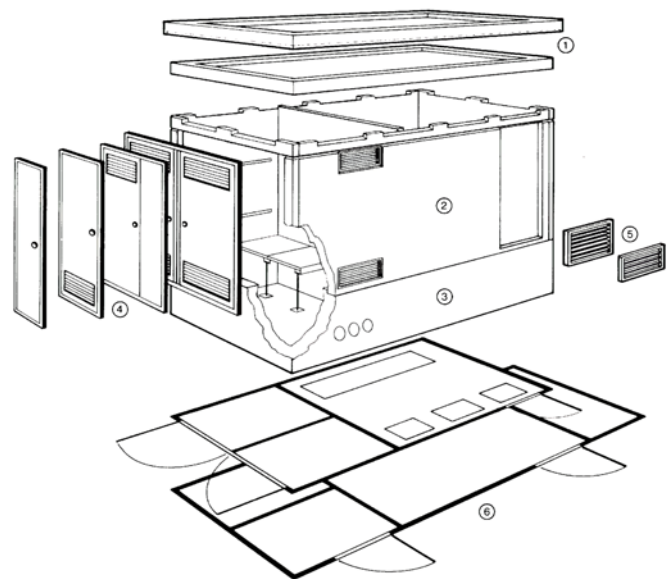

Comprehensive equipment

The basic version of the prefabricated buildings is already extensively equipped at the factory:

- ✓ Doors
- ✓ Roof drainage system
- ✓ Supply and extraction elements
- ✓ Cable entries
- ✓ Cable basement with intermediate floor

Adaptable construction

What makes our prefabricated buildings truly unique is their adaptable construction. We offer various construction methods, including slab and sandwich construction in variable dimensions and with or without basements. Our building types can be combined with each other to create customized multi-building complexes. But the flexibility does not end there: we enable the individual arrangement of partition walls, offer various intermediate floors and cable entry systems, as well as customized ventilation systems.

- | | |
|-------------------------|-----------------------|
| 1 Roof panels | 2 Walls |
| 3 Installation basement | 4 Doors |
| 5 Ventilation grid | 6 Variable floor plan |

PREFABRICATED BUILDINGS

Self-supporting structure

Our room cells are designed as self-supporting structures. This means that they can be relocated to a new location at a later date with little effort.

Individual facade design

The exterior design of our prefabricated buildings is also customizable, from textured render to exposed aggregate concrete or clinker brick to your RAL color of choice. Wood paneling or a design in exposed concrete look, both smooth and textured, are also possible.

Versatile and adaptable

For complete pumping stations, our prefabricated buildings can be combined with our channel structures. As an option, we also offer professional on-site installation by our skilled specialists to ensure maximum convenience and efficiency. Discover the versatility and adaptability of our prefabricated buildings, which are suitable for almost any application.

About us

B+F Beton- und Fertigteilgesellschaft mbH Lauchhammer manufactures high-quality precast reinforced concrete elements. For over 30 years, our company has specialized in the development, manufacture, delivery and installation of precast concrete elements for a wide range of applications in supply and disposal, transportation, environmental protection, communication, object protection and civil engineering. We are pleased to assist you.
