

# ***PREFABRICATED BUILDINGS***

We have decades of experience in the **planning**, the **production** and the **assembly** of prefabricated buildings for all railway infrastructure applications.

## **Comprehensive accessories**

The prefabricated buildings are already extensively equipped in their basic version on our production site:

- Aluminum door
- Roof drainage system
- Air supply and discharge elements
- Cable entries
- Cable basement and intermediate floor

## ***PREFABRICATED BUILDINGS***

### **Self-supporting structure**

Our room cells are designed as a self-supporting structure. This makes it possible to relocate them to a new site at a later date without great effort.

### **Individual facade design**

The facade design is made completely according to your wishes: As artificial peat plaster according to the RAL color chart, as a clinker facade or in a classic exposed aggregate concrete look.

### **Wood panelling or exposed concrete look**

Wood paneling or an exposed concrete look, both smooth or textured, are also possible.

**B+F Beton- und Fertigteilgesellschaft mbH Lauchhammer**

Bockwitzer Straße 85  
01979 Lauchhammer
