

COMPONENTS FOR VEHICLE SCALES

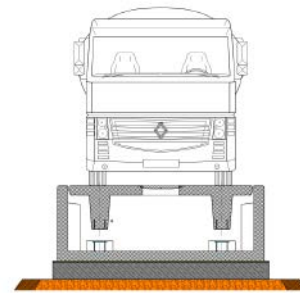

Vehicle scales in various designs

We manufacture and supply components and complete vehicle scales for road and rail tracks. They are used, for example, in industrial plants, agricultural businesses, gravel factories or recycling companies.

Underfloor scale - Standard

Suitable for use under extreme conditions.

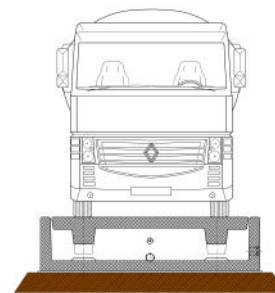

- ✓ Complete construction, consisting of closed weighing pit and one-piece weighing bridge
- ✓ Designed for 4 or 6 measuring cells

Underfloor scale - Flat

Suitable for locations with high groundwater levels or on contaminated soil.

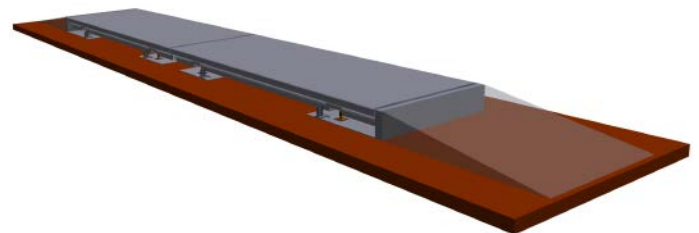

- ✓ Complete construction, consisting of split weighing pit and weighing bridge
- ✓ Designed to accommodate 8 measuring cells

Overfloor scale

Can be used in locations where no excavation pit is possible or permitted for space reasons or where forced guidance for lorries is desired, e.g. in gravel and sand mines.

- ✓ Divided weighbridge
- ✓ Four prefabricated foundations with measuring box plates set in concrete
- ✓ Installation of the prefabricated foundations and bridges on foundations prepared on site
- ✓ Designed to accommodate 8 measuring cells

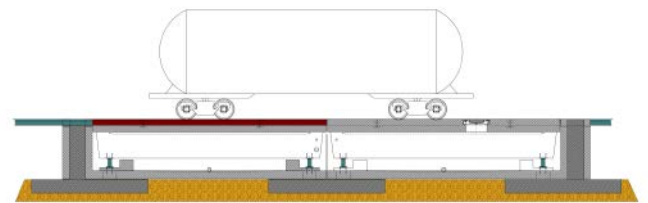

COMPONENTS FOR VEHICLE Scales

Track scales

We plan and implement systems for weighing rail vehicles that are individually tailored to your needs. Combination scales for both rail and road vehicles are also part of our product portfolio. On request, we can also supply you with EBA-compliant statics.

Advantages

- ✓ Fast assembly and flexible modular system
- ✓ Impressively long service life
- ✓ Highest quality and precision
- ✓ Integration of all standard measuring cells possible without any difficulty
- ✓ Construction complies with current regulations
- ✓ Type statics
- ✓ If required: professional installation by our qualified team

About us

B+F Beton- und Fertigteilgesellschaft mbH Lauchhammer manufactures high-quality precast reinforced concrete elements. For over 30 years, our company has specialized in the development, manufacture, delivery and installation of precast concrete elements for a wide range of applications in supply and disposal, transportation, environmental protection, communication, object protection and civil engineering. We are pleased to assist you.
